IMPROVED POWER
NEVER SETTLE FOR LESS

YLM 3.0 modules use high efficiency p-type monocrystalline PERC cell technology. With high quality encapsulation materials and classic glass-backsheet structure, YLM 3.0 modules are perfectly suited to the harsh environment and provide you with high reliability and quality assurance.

Classic Structure
The glass-backsheet structure and layout design have been proven in the market for a long time.

Superior Yield
The large size cell enhances the module’s power output, while the excellent temperature coefficient and comprehensive LID/LeTID degradation suppression technology allow the module to generate more energy yield once in use.

Excellent Durability
The modules meet IEC standard testing requirements and are resistant to salt mist, ammonia, dust and sand, snail trail and PID risks.

Wide Applications
The glass-backsheet structure, special material selection and extra-strong frames effectively enhance the mechanical performance of the modules, their compatibility with mainstream trackers and inverters, and their adaptability to harsh environments.

Lower Losses
The multi-busbar design effectively reduces the impact of micro-cracks and broken busbars, and the half-cell structure effectively reduces the impact of shadow shading.

QUALIFICATIONS & CERTIFICATES

Yingli Solar
Headquartered in Baoding, China, Yingli Energy Development Company Limited, known as Yingli Solar, is a leading solar solution provider. Yingli Solar is committed to providing clean, renewable energy through PV power generation technology for factories, homes and utilities around the world. Yingli Solar provides reliable products and services through continuous technological advancement and management innovation.

*NOCT: open-circuit module operation temperature at 800 W·m<sup>–2</sup> irradiance, 20°C ambient temperature, 1 m·s<sup>–1</sup> wind speed.

**THERMAL CHARACTERISTICS**

- Nominal operating cell temperature: NOCT °C: 45 ± 2
- Temperature coefficient of P<sub>max</sub>: γ °%/°C: -0.35
- Temperature coefficient of V<sub>oc</sub>: β °%/°C: -0.27
- Temperature coefficient of I<sub>sc</sub>: α °%/°C: 0.05

**OPERATING CONDITIONS**

- Max. system voltage: 1000 V<sub>mp</sub> / 1500 V<sub>oc</sub>
- Max. series fuse rating*: 25 A
- Operating temperature range: -40°C to 85°C
- Max. static load, front (e.g., snow): 5400 Pa
- Max. static load, back (e.g., wind): 2400 Pa
- Max. hailstone impact (diameter / velocity): 25 mm / 23 m·s<sup>–1</sup>

*DO NOT CONNECT FUSE IN COMBINER BOX WITH TWO OR MORE STRINGS IN PARALLEL CONNECTION.

**CONSTRUCTION MATERIALS**

- Cell (material / quantity): p-type monocrystalline silicon / 6 x 18
- Glass (material / thickness): low-iron tempered glass / 3.2 mm
- Frame (material): anodized aluminum alloy
- Junction box (type / protection degree): 3 bypass diodes / ≥ IP68
- Cable (length / cross-sectional area): ± 1200 mm / 4 mm²

---

*Due to continuous innovation, research and product improvement, the specifications in this product information sheet are subject to change without prior notice. The specifications may deviate slightly and are not guaranteed.

*The data do not refer to a single module and they are not part of the offer, they only serve for comparison to different module types.
